

# TRAINING

## Introduction to MATLAB

**Date:** 21 –24 November 2021

**Time:** 9:00 a.m. - 1:00 p.m.

**Fees:** 150 K.D.

### Objectives:

The primary objective of this course is to help the participants learn quickly the first steps of MATLAB. The emphasis in this course is learning by doing". Working through simple examples will give participants a feel for the way that MATLAB operates. MATLAB Training also provides users with access to improved capabilities for analyzing and visualizing scientific data. This course will help engineers/researchers learn and use MATLAB for:

- Solving simple numerical expressions and mathematical formulas.
- Matrix operations.
- Scientific programming .
- Solving linear equations.
- Solving eigenvalue problems.
- Curve fitting.
- 2D and 3D plotting.

**Instructor:** Dr. Jafarali Parol.

**Participants:** Researchers, scientists, engineers, and students.

**Registration Deadline:**

**14 November 2021**
