

# Training Courses January

2024

## Fuels Specification and Test Methods

**Dates:** 14 - 16 January 2024.

**Time:** 09:00 a.m. - 02:00 p.m.

**Fees:** 200 K.D.

**Objectives:**

**At the end of the course, participants will:**

- Have an overview on the fuel industry.
- Comprehend the chemistry of the fuel at a molecular level.
- Know how fuel are evaluated based on their properties.
- Understand the Fuel production processes.
- Be familiar with the international fuel specifications.
- Understand how to improve the fuel properties with additives.
- Assess the impact of the fuel properties on its processability.

**Prerequisites:** N/A

**Instructors:** Dr. Hassan Al-Rabiah, and Dr. Mohan S. Rana.

**Participants:** Chemists, chemical engineers, petroleum engineers, technicians and anyone involve in decision making or working in oil related industry and business in need to understand fuel specification.
