

Importance of Biochar to Increase Crop Production

Dates: 27 - 29 November 2022

Time: 09:00 a.m. 12:00- p.m.

Fees: 250 K.D.

Objectives:

At the end of the course, participants will:

- Handle agriculture waste sustainably, and reduce pressure on landfill.
- Improve understanding on biochar uses and benefits.
- Identify suitable feedstock for biochar production.
- Produce biochar from potential feedstock in Kuwait.
- Appreciate biochar uses to increase soil carbon sequestration to mitigate climate change.

Instructors: Dr. Hana'a Burezq, Ms. Faten Khalil, and Dr. Shabbir A. Shahid.

Participants: Minimum B.Sc. degree, agriculture engineers, professionals/researchers, Farm managers, soil technicians, and field assistants.
